Forecast for Saturday 13 Jul 2024

Weather: A mainly dry albeit rather cloudy day with occasional bright or sunny intervals. Isolated showers may break out with the very small chance of the odd heavy one and the outside chance of a rumble of thunder. Becoming dry into the evening.

Chance of cloud-free hill tops above 600m: 70%.

Low cloud and visibility: Patches of cloud above 700-800m at times but summits clear of cloud at times. Generally very good visibility but locally poor in cloud and in any heavier showers/thunderstorms.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Whilst staying dry for most, showers may suddenly develop without any notice with a small chance of thunder. It is worth being aware of what to do in a thunderstorm if you are caught out in an exposed location. Despite not feeling that hot, UV levels will be high so sun protection is advised.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Thu 11 Jul 2024	0.4mm	3.6mm	22.6mm

Forecast for Sunday 14 Jul 2024

Weather: Any early mist or shallow fog in the valleys clearing to leave a generally dry and bright day with periods of sunshine. Patchy cloud bubbling up with the outside chance of a rogue shower. Feeling warmer with high UV levels. Turning windier into the afternoon.

Maximum wind: Westerly 20-25 mph later in the day.

Chance of cloud-free hill tops above 600m: 70% becoming >95%.

Low cloud and visibility: Patches of cloud may form around 500-600m an hour or two after dawn before rapidly lifting and dispersing. The odd scrap on the highest summits near any showers, but generally all summits free of cloud.

Temperature: **Valleys:** Plus 8 Celsius rising to plus 21 Celsius.
At 600m: Plus 7 Celsius rising to plus 15 Celsius.
Freezing level: Well above the summits.
